

## The Resubmission – part Jenkins

### 1. Git part configuration

The screenshot shows the Jenkins configuration page for the 'gabi-udacity-ecommerce' job, specifically the 'Source Code Management' tab. The 'General' tab is also visible. The 'Source Code Management' section is configured with 'Git' as the source code management system. The 'Repository URL' is set to 'https://github.com/gabriela-spiescu/udacity-ecommerce.git'. The 'Credentials' dropdown is set to 'none'. The 'Branches to build' section has a 'Branch Specifier (blank for 'any')' set to '\*/master'. The 'Repository browser' is set to '(Auto)'. The 'Build Triggers' section has 'Trigger builds remotely (e.g., from scripts)' checked. The 'Additional Behaviours' section has an 'Add' button. The 'Subversion' section is empty. The 'Save' and 'Apply' buttons are at the bottom.

General Source Code Management Build Triggers Build Environment Build Post-build Actions

☐ Block build when downstream project is building

☐ Use custom workspace

Display Name

☐ Keep the build logs of dependencies

**Source Code Management**

☐ None

☒ Git

Repositories

Repository URL

Credentials

Branches to build

Branch Specifier (blank for 'any')

Repository browser

Additional Behaviours

☐ Subversion

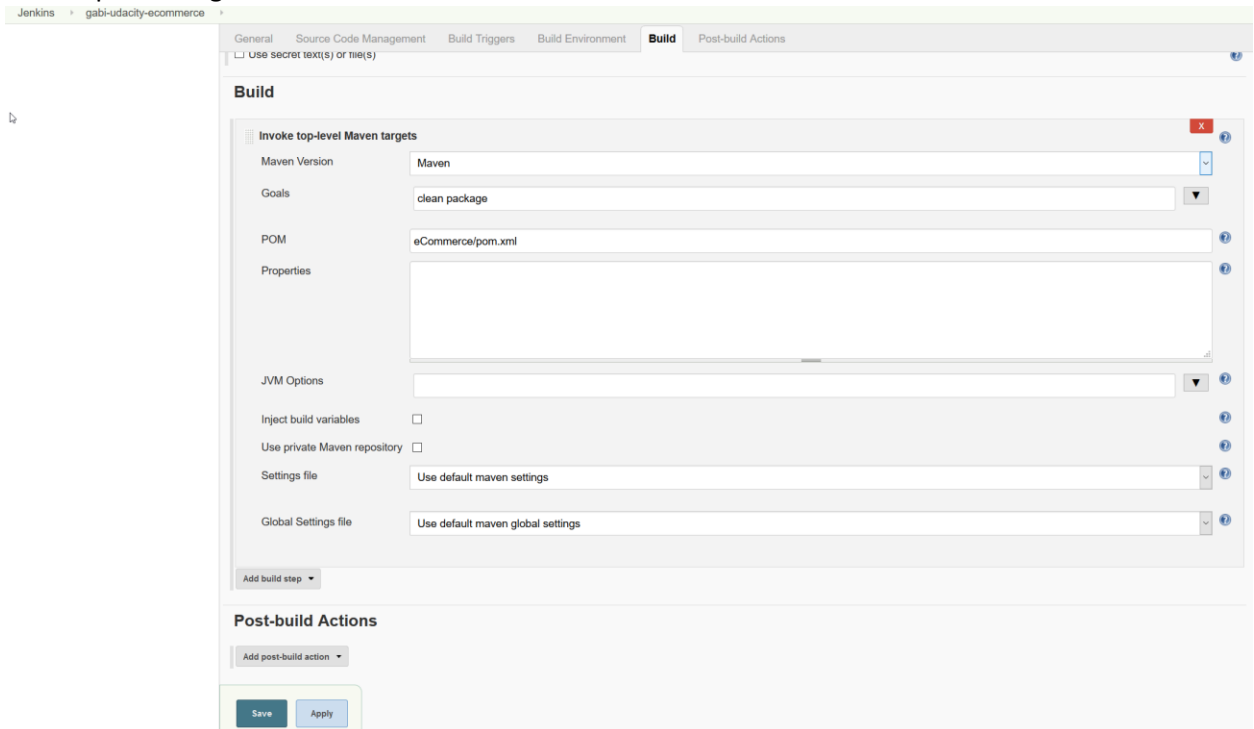

**Build Triggers**

☐ Trigger builds remotely (e.g., from scripts)

☐ Build after other projects are built

☐ Build periodically

### 2. Maven part configuration

The screenshot shows the Jenkins configuration page for the 'gabi-udacity-ecommerce' job, specifically the 'Build' tab. The 'General' and 'Source Code Management' tabs are also visible. The 'Build' section is configured with 'Invoke top-level Maven targets'. The 'Maven Version' is set to 'Maven'. The 'Goals' are set to 'clean package'. The 'POM' is set to 'eCommerce/pom.xml'. The 'Properties' section is empty. The 'JVM Options' section is empty. The 'Inject build variables' checkbox is unchecked. The 'Use private Maven repository' checkbox is unchecked. The 'Settings file' is set to 'Use default maven settings'. The 'Global Settings file' is set to 'Use default maven global settings'. The 'Add build step' button is at the bottom. The 'Post-build Actions' section is empty. The 'Save' and 'Apply' buttons are at the bottom.
